

Blog Editor Quick Start Guide

5-minute guide to using the enhanced blog editor

🌟 What's New?

Your blog editor now has **WordPress-level control** with:

- 🎨 **Tables** - Visual table editor
- 🎨 **Colors** - Text & highlight color pickers
- 📐 **40+ Layout Classes** - Grids, cards, callouts, columns
- ✍️ **Custom CSS** - Per-post styling
- 📄 **Professional Fonts** - Inter + Playfair Display

🚀 Quick Examples

1. Insert a Table (30 seconds)

1. Click the **table icon** in toolbar
2. A 3×3 table appears with headers
3. **Edit cells:** Click inside any cell and type
4. **Add rows/columns:** Use **R+** or **C+** buttons
5. **Delete:** Select cell, use **R-** or **C-** buttons

Result:

Header 1	Header 2	Header 3
Cell 1	Cell 2	Cell 3

2. Add Colors (15 seconds)

Text Color:

1. Select text
2. Hover **palette icon** 🎨
3. Click a color

Highlight:

1. Select text
2. Hover **highlighter icon**
3. Click a color

Result: Colored and highlighted text

3. Create a 2-Column Layout (1 minute)

1. Click **Insert HTML** button (code icon `</>`)
2. Paste this code:

```
<div class="blog-grid-2">
  <div class="blog-card">
    <h3>Column 1</h3>
    <p>Your content here...</p>
  </div>
  <div class="blog-card">
    <h3>Column 2</h3>
    <p>Your content here...</p>
  </div>
</div>
```

3. Click "Insert"

Result: Two side-by-side cards (mobile-responsive!)

4. Add an Info Callout (30 seconds)

1. Click **Insert HTML** button
2. Paste:

```
<div class="blog-callout-info">
  ⓘ This is an important tip for readers!
</div>
```

Result: Blue info box with border

Other callouts:

- `.blog-callout-warning` → Yellow warning
 - `.blog-callout-success` → Green success
 - `.blog-callout-danger` → Red danger
-

5. Floating Image with Text Wrap (45 seconds)

1. Click **Insert HTML** button
2. Paste:

```

<p>Your text will wrap around the image on the left side...</p>
```

Options:

- `.blog-img-float-left` - Image on left, text on right
 - `.blog-img-float-right` - Image on right, text on left
 - `.blog-img-caption` - Centered caption below image
-

6. Custom CSS (Advanced - 2 minutes)

For unique styling needs:

1. Scroll to **"Custom CSS (Optional)"** field below content editor
2. Write your styles:

```
.my-gradient-box {
  background: linear-gradient(135deg, #667eea 0%, #764ba2 100%);
  color: white;
  padding: 2rem;
  border-radius: 1rem;
  text-align: center;
}
```

3. Use in content (Insert HTML):

```
<div class="my-gradient-box">
  <h2>Special Announcement!</h2>
  <p>This box has a custom gradient background.</p>
</div>
```

See All Options

View the Style Guide:

1. While editing a blog post, click " **View Style Guide**" link
2. Or navigate to: `/admin/blog-style-guide`

What's in the Style Guide:

- Live previews of ALL 40+ classes
- Copy-to-clipboard buttons
- HTML code examples
- Font showcase

- Quick reference

Most Popular Classes

Layout

```
<div class="blog-grid-2">...</div>      <!-- 2 columns -->
<div class="blog-grid-3">...</div>      <!-- 3 columns -->
<div class="blog-grid-sidebar">...</div> <!-- Main + sidebar -->
```

Cards & Boxes

```
<div class="blog-card">...</div>        <!-- Basic card -->
<div class="blog-card-highlight">...</div> <!-- Gradient card -->
<div class="blog-callout-info">...</div> <!-- Blue info box -->
```

Typography

```
<p class="blog-drop-cap">Text...</p>    <!-- Large first letter -->
<span class="blog-text-highlight">...</span><!-- Yellow highlight -->
<blockquote class="blog-pull-quote">...</blockquote>
```

Buttons

```
<a href="#" class="blog-button">Click Me</a>
<a href="#" class="blog-button-outline">Learn More</a>
```

Pro Tips

1. Combine Classes

```
<div class="blog-grid-2">
  <div class="blog-callout-info">
    <h3>Tip 1</h3>
    <p>Info in a grid!</p>
  </div>
  <div class="blog-callout-success">
    <h3>Tip 2</h3>
    <p>Success in a grid!</p>
  </div>
</div>
```

2. Responsive Images

All image classes are mobile-responsive:

- Floats clear on small screens
- Grids stack vertically on mobile

3. Hover for Color Palettes

Don't click the color icons - **hover** them to see the color palette!

4. Table Shortcuts

When cursor is in a table:

- Tab → Move to next cell
- Extra toolbar buttons appear automatically

5. Preview Before Publishing

1. Click **"Preview"** tab in the blog form
 2. See exactly how your post will look
 3. Switch back to **"Edit"** tab to make changes
-

Troubleshooting

My custom styles aren't working

Cause: CSS conflicts with existing styles

Fix:

1. Use more specific selectors:

```
/* Instead of: */
.my-box { color: red; }

/* Use: */
.blog-content .my-box {
  color: red !important;
}
```

Table buttons don't appear

Cause: Cursor not inside table

Fix: Click inside a table cell to see row/column buttons

Colors not showing in palette

Cause: Clicking instead of hovering

Fix: **Hover** over palette/highlighter icons (don't click the icon itself)

Float images not wrapping

Cause: Not enough text

Fix: Add more text content after the image, or use a different layout

Mobile Preview

All layouts are responsive:

- 2-3 column grids → Stack to 1 column on mobile
- Floating images → Center and full-width on mobile
- Tables → Horizontal scroll if too wide
- Buttons → Full-width on small screens

Test on mobile:

Use browser dev tools (F12) → Toggle device toolbar
