

Teaching Events Admin - Quick Reference

What Was Changed?

1. Teacher Assignment

Admin can now assign a specific teacher to each teaching event via dropdown.

Before: No teacher selector

After: Teacher dropdown in Basic Info tab with all active teachers

2. Online vs Offline Handling

Online Events:

- ☒ Meeting Link field (required)
- ☒ Service Location Country/City (required, for SEO)
- ☒ No Physical Address
- ☒ No Coordinates

Offline Events:

- ☒ No Meeting Link
- ☒ Physical Location Country/City (required)
- ☒ Full Address (required)
- ☒ Coordinates (optional)

Hybrid Events:

- ☒ Meeting Link (required) - Treated as Online
- ☒ Service Location Country/City (required, for SEO)
- ☒ No Physical Address
- ☒ No Coordinates

3. Data Mapping

The frontend uses `teachingMode` but sends `eventType` to backend:

- Frontend: `teachingMode` = 'Online' | 'Offline' | 'Hybrid'
- Backend: `eventType` = 'Online' | 'Offline'
- Hybrid gets converted to Online when sending to backend

For Admin Users

Creating a Teaching Event

Step 1: Basic Info

- Fill Title, Description
- Select Category
- Select Teaching Type (Class, Course, etc.)
- **NEW:** Select a Teacher from dropdown
- Set Age Range
- Select Teaching Mode (Online/Offline/Hybrid)
- Fill other basic fields

Step 2: Schedule & Pricing

- Set Base Price
- Add one or more schedules
- Set dates, times, seats, pricing

Step 3: Advanced Settings

- If **OFFLINE**: Fill Country, City, Address, Coordinates
- If **ONLINE/HYBRID**: Fill Country, City, Meeting Link
- Add FAQs

- Optimize SEO metadata

For Developers

Key Files Modified

```
frontend/
├── src/components/admin/
│   ├── TeachingBasicInfoTab.tsx      (Added teacher dropdown)
│   └── TeachingAdvancedTab.tsx       (Conditional fields)
└── src/pages/admin/
    └── AdminTeachingEditEventPage.tsx (Form handling & mapping)
```

Data Structure

```
// Form data (frontend)
{
  teachingMode: 'Online' | 'Offline' | 'Hybrid',
  teacherId: string,
  country: string,
  city: string,
  address: string,
  meetingLink: string,
  ...
}

// Sent to backend as (after transformation)
{
  eventType: 'Online' | 'Offline', // teachingMode converted
  teacherId: string,
  location: {
    country: string,
    city: string,
    address: string | undefined, // undefined for online
    coordinates: {lat, lng} | undefined // undefined for online
  },
  meetingLink: string | undefined, // undefined for offline
  ...
}
```

Validation Rules

For All Events:

- ☒ Title (required)
- ☒ Description (required)
- ☒ Category (required)
- ☒ Teacher (required) **NEW**
- ☒ Country (required) **NEW**
- ☒ City (required)
- ☒ Price (required)
- ☒ Schedule (required)

For Offline Only:

- ☒ Address (required)
- ☒ Age Range (required)

For Online/Hybrid Only:

- ☒ Meeting Link (required)

Optional:

- Coordinates (offline)
- Latitude/Longitude (offline)
- Address (online/hybrid)

Common Tasks

Create an Online Teaching Event

1. Go to Admin → Teaching Events → Create
2. Fill basic info and select a teacher
3. Select "Online" from Teaching Mode
4. Fill country and city (for SEO)
5. Add meeting link (Zoom, Google Meet, etc.)
6. Fill schedule and pricing
7. Add FAQs and SEO metadata
8. Save

Change Event Type from Offline to Online

1. Edit existing offline event
2. Change Teaching Mode from "Offline" to "Online"
3. Address field disappears (no longer required)
4. Meeting link field appears (now required)
5. Update meeting link
6. Save

Assign Different Teacher

1. Edit teaching event
2. Change teacher in dropdown
3. Save
4. Teacher updated automatically

Common Issues & Solutions

Issue: Teacher Dropdown Empty

Solution: Ensure teachers are created in system and marked as active

Issue: Meeting Link Field Not Showing

Solution: Change Teaching Mode to "Online" or "Hybrid"

Issue: Address Field Validation Error (Online Event)

Solution: This field shouldn't appear for online. Check Teaching Mode selection.

Issue: "Country is required" Error

Solution: Select a country in the Country dropdown (required for all events)

Issue: Data Not Saving

Solution: Check that all required fields are filled (marked with red asterisk *)

API Endpoints

Get Available Teachers

```
GET /api/admin/teaching-events/teachers
Returns: [{_id, fullName, email}, ...]
```

Create Teaching Event

```
POST /api/admin/teaching-events
Body: Complete teaching event data with eventType
```

Update Teaching Event

```
PUT /api/admin/teaching-events/:id
Body: Partial teaching event data
```

Change Only Teacher

```
PUT /api/admin/teaching-events/:id/change-teacher
Body: {teacherId}
```

Form Submission Example

Online Event Payload:

```
{
  "eventType": "Online",
  "meetingLink": "https://zoom.us/j/123456",
  "location": {
    "country": "AE",
    "city": "Dubai",
    "address": null,
    "coordinates": null
  },
  "teacherId": "507f1f77bcf86cd799439011",
  "seoMeta": {
    "title": "Advanced React Mastery",
    "description": "Learn advanced React patterns",
    "keywords": ["react", "javascript", "web development"]
  }
}
```

Offline Event Payload:

```
{
  "eventType": "Offline",
  "meetingLink": null,
  "location": {
    "country": "AE",
    "city": "Dubai",
    "address": "123 Main Street, Business Bay",
    "coordinates": {
      "lat": 25.1972,
      "lng": 55.2744
    }
  },
  "teacherId": "507f1f77bcf86cd799439011",
  "seoMeta": {
    "title": "Advanced React Workshop",
    "description": "Hands-on React workshop in Dubai",
    "keywords": ["react", "workshop", "dubai"]
  }
}
```

- ☐ Schedule dates valid (future dates)
- ☐ SEO title & description **filled** (or will auto-fill)
- ☐ FAQs added (optional but recommended)
- ☐ Ready to submit ✓

FAQ

Q: Can I use both address and meeting link?

A: No, choose one based on event type. Online = meeting link, Offline = address.

Q: What if I want a hybrid event in multiple cities?

A: Create separate events for each city, or use one country/city as the primary location for SEO.

Q: Can students see the teacher information?

A: Yes, teacher name and email are displayed on the event details page.

Q: What happens if I change the event type?

A: The form fields update accordingly. Required fields change based on type.

Q: Is teacher assignment mandatory?

A: Yes, every teaching event must have a teacher assigned.

Q: What if teacher goes inactive?

A: Events won't be affected, but you won't be able to select that teacher for new events.
