

Test Specifications: Frontend & End-to-End

Gema Event Management Platform
Generated: 2026-02-25

1. Frontend Route Navigation

Test ID	Description	Preconditions	Input/Interaction	Expected Output	Priority
TC-FE-001	Home Page Loads smoothly	None	Go to /	Loads < 2s; No Layout Shifts; shows <code>HomePageSkeleton</code> while loading data	High
TC-FE-002	Search Input Debouncing	Events available	Type rapidly in search bar	Results filter ~300ms after typing stops; smooth UX	High
TC-FE-003	Route Transition to Event Detail	Events loaded in grid	Click Event Card	Instantly changes route (< 200ms); URL is <code>/events/:slug</code>	High

2. Event Routing (Slug vs ID)

This specifically validates the Slug migration backward compatibility.

Test ID	Description	Preconditions	Input/Interaction	Expected Output	Priority
TC-FE-004	Navigate via URL Slug	Event has slug	Go to <code>/events/event-slug-name</code>	Event loads normally	High
TC-FE-005	Navigate via Legacy Mongo ID	Event ID exists	Go to <code>/events/:mongodb_id</code>	Event loads normally, UI identical to slug	High
TC-FE-006	API responds with Slug	Event queried	GET <code>/api/events/:slug</code>	200 OK; Response JSON includes <code>slug</code> field	High
TC-FE-007	Share Event Link	On Event Page	Click "Share"	Shared URL automatically uses slug format, not ID	Medium

3. Dynamic Form Behaviors (Admin/Vendor)

Test ID	Description	Preconditions	Input/Interaction	Expected Output	Priority
TC-FE-008	Offline Event Fields Required	Create Event mode	Select "Offline" teaching mode	Address and Coordinates fields render; forms fail submission if omitted	High
TC-FE-009	Online Event Fields Required	Create Event mode	Select "Online" / "Hybrid"	Meeting link renders; form fails if omitted; physical address not required	High

4. SEO & Meta Validation

Test ID	Description	Preconditions	Input/Interaction	Expected Output	Priority
TC-FE-010	Canonical Tags use correct URLs	On Event detail page	Inspect <code><link rel="canonical"></code>	Value resolves to <code>/events/:slug</code> and matches OG tags	Medium

5. Performance Checkpoints (Manual)

- **Lighthouse Score:** Ensure Lighthouse Performance score ≥ 80 on Desktop.
- **Scroll FPS:** Scroll through the Events grid with > 100 items. Ensure 60fps scrolling without stuttering (validating List Memoization).
